

VeriWave Signs Israeli Distributor

VeriWave Partners with Startronics to represent VeriWave in Israel

PORTLAND, OR — October 26, 2005 — VeriWave, Inc., the leading provider of test systems for performance analysis of wireless local area network (WLAN) products, announced today that it has signed a distribution agreement with Startronics to re-sell and support VeriWave's products in Israel.

"With some of the world leaders in Wireless LAN equipment and chip development located in Israel, adding VeriWave to our portfolio is a natural choice", commented Avner Arroyo, general manager of Startronics, "We are focused on enhancing our product offering in the fast-growing areas of VoIP and wireless networks. VeriWave's superior product and Startronics experience and knowledge, will enable us to offer a best-of-breed solution to our customers in the Wireless LAN community."

Startronics, founded in 1982, services Israeli networking equipment developers and manufactures by selling and supporting advanced communications test equipment. Startronics utilizes a highly experienced set of individuals who are experts in local area and wireless networking.

"We are thrilled to be partnering with Startronics, Israel's leading test equipment distribution organization," said Chris DeMonico, VeriWave's chief executive officer. "Israel represents one of the most important international markets for VeriWave. By partnering with this highly experienced team of professionals, we will be able to address the needs of the large number of networking development companies based in Israel. Startronics has a proven track record of excellence, and together we will be able to provide the best performance analysis equipment for the wireless LAN market."

About VeriWave

VeriWave is the leading provider of test systems for performance analysis of wireless local area network (WLAN) products. VeriWave's products are used by equipment manufacturers to accurately analyze the performance of their products, as well as by carriers and enterprise users to make the right choice when selecting WLAN equipment for deployment in their networks.
