

WaveManager™ End of Life (EOL) Announcement

Date – June 28, 2008

WaveManager™ - WaveTest™ Application Interface

VeriWave is providing customers with advance notice of the End of Life (EOL) support for all versions of WaveManager application software. VeriWave will discontinue all support for WaveManager on December 31, 2008.

Reason for EOL:

The WaveManager application is being discontinued due to the availability of an alternative superior product, WaveDynamix, which addresses both functional test and system test requirements. In addition to that it supports independent control plane and data plane testing capabilities.

For more information about WaveDynamix – www.veriwave.com/products/wavedyanmix

End of Sale:

Effective June 30, 2008, VeriWave will discontinue selling WaveManager.

Compatibility Issues:

- The recommended replacement, WaveDynamix configuration files are not compatible with the discontinued WaveManager configuration files.
- For proper operation of WaveDynamix, WaveTest version 3.3.1 or higher must be used. Contact VeriWave support to obtain this software version.

Maintenance Updates:

Maintenance (bug fixes only) updates to WaveManager will continue until October 1, 2008 at which time this service will be discontinued.

Technical Support:

Technical support for WaveManager will continue through December 31, 2008, at which time all support will be discontinued. In the meantime, technical support will continue to provide telephone troubleshooting and workaround assistance, but the resolution may require migration to WaveDynamix software. In addition, development / engineering assistance may not be available.

Product Life Cycle Policy:

Please refer to the below table for important dates:

WaveManager Milestones	Effective Dates
End of Sale	June 30, 2008
End of Maintenance Service	October 1, 2008
End of Life	December 31, 2008
