

VeriWave to Appear on Cisco Mobility TV - June 9, 2009

WiFi Performance Analysis Leader Describes how to Build Wireless LANs That Scale

PORTLAND, OR, June 1, 2009 –VeriWave, Inc., leading provider of network performance analysis solutions, has been invited to appear on Cisco Mobility TV airing June 9, 2009 at 10:00am Pacific Time. The episode, titled, “Beyond Casual Mobility: Building Wireless LANs That Scale,” will feature best practices for building and scaling wireless LAN unified networks in the enterprise.

VeriWave’s VP of Engineering, Tim Bennington-Davis will discuss how to predict, ensure and verify the performance of various applications throughout the design and deployment of a unified network. The segment will include real-world insights gleaned from a recent large-scale wireless LAN deployment by an IT department of a prominent global service provider.

Who should attend?

Technical managers in large and medium-sized organizations and educational institutions involved in developing wireless network strategies and/or implementing wireless networks.

Topics to be addressed:

- Designing and deploying topologies such as campus, branch and remote sites
- How to effectively integrate wired and wireless LAN services
- Designing your WLAN architecture so networks scale to meet future demands
- Strategies for validating performance on 802.11n next-generation WLANs
- Lessons learned from one of the largest 802.11n deployments in the world

Attended by thousands of live viewers, Cisco Mobility TV webcasts feature Cisco partners and other prominent industry experts offering trend analysis and practical tutorials on using next-generation Wireless LANs (WLANs) to optimize business.

VeriWave’s WaveTest systems let designers, and users of wireless LANs test, measure and analyze all performance aspects of their networks before deployment, during installation and after going live. This includes 802.11n, voice, video, roaming efficiency, and end-user Quality of Experience (QoE). These solutions are tailored for mobility in healthcare, retail, education, corporate offices, government and other enterprise networks.

Registration is available at http://www.cisco.com/go/semreg/partner/177731_28

About VeriWave

Testing with VeriWave ensures maximum performance for mobile networks, devices and applications in the real world. From development through deployment and beyond, VeriWave helps leading manufacturers, service providers and users measure, analyze and improve speed, quality, interoperability, compliance and other pivotal aspects of mobile performance. For more information about VeriWave, call (503) 473-8350, or go to www.veriwave.com
